DETAILED ACTION

The amendments filed on 05/17/2007, has been received and entered.

Claims 1-7 have been canceled.

Claims 8-15 are pending in this application and were examined on their merits.

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office Action.

All the objections not repeated in the instant Office Action have been withdrawn due to applicant's response to the previous Action.

Double Patenting

The rejection of claims 7-14 on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-22 of Yonehara et al. US Patent No. 6,790,665, has been withdrawn due to terminal disclaimer filed on 05/14/2007.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 15 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter, which

was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Any claim containing a negative limitation, which does not have basis in the original disclosure should be rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement

Claim Rejections - 35 USC § 102

The rejection of claims 7-9 and 11-14 are rejected under 35 U.S.C. 102(e) as being anticipated by Yonehara et al. US patent No. 6,790,665, has been withdrawn due to the applicant's amendment to the claims filed on 05/14/2007.

Claims 8, and 12-15 are newly rejected under 35 U.S.C. 102(e) as being anticipated by Komori et al. (European patent application, EP1 002874 A2, Published June 24th, 2000).

Claims 8, and 12-15 are drawn to a method of measuring a glycosylated protein comprising, treating a sample containing the glycosylated protein with a protease in the presence of a sulfonic acid compound and in the absence of a tetrazolium compound, allowing a glycosylated portion of a glycosylated protein degradation product obtained by the degradation and a fructosyl amino acid oxidase to react with each other and measuring

the redox reaction, a nitro compound, and measuring the degree of the color developed by the substrate.

Komori et al. discloses a method of measuring a glycated protein comprising, treating a sample containing the glycated protein with a protease in the presence of a sulfonic acid compound (0057) and in the absence of a tetrazolium compound (see p.8, Example 1, especially 0079, lines 2-3), allowing a glycated portion of a glycated protein degradation product obtained by the degradation and a fructosyl amino acid oxidase to react with each other and measuring the redox reaction (0004, 0030, 0050 and 0051), a nitro compound (0017), and measuring the degree of the color developed by the substrate (0059).

Komori et al. therefore clearly anticipates the claimed invention.

Claim Rejections - 35 USC § 103

The rejection of claims 7-14 under 35 U.S.C. 103(a) as being unpatentable over Komori et al. (European patent application, EP1 002874 A2, Published June 24th, 2000) in view of Oshiro et al. (Clin. Biochem. 1982, Vol. 15, No.1, p.83-88) and further in view of Ishimaru et al. (Patent No. 6,127,138 issued Oct. 3, 2000) and further in view of Johnson et al. (Blood, 1994, Vol.83, No.4, p.1117-1123), has been withdrawn due to the applicant's amendment to the claims filed on 05/14/2007.

Claims 8-15 are newly rejected under 35 U.S.C. 103(a) as being unpatentable over Komori et al. (European patent application, EP1 002874 A2, Published June 24th,

2000) in view of Oshiro et al. (Clin. Biochem. 1982, Vol. 15, No.1, p.83-88) and further in view of Ishimaru et al. (Patent No. 6,127,138 issued Oct. 3, 2000) and further in view of Johnson et al. (Blood, 1994, Vol.83, No.4, p.1117-1123) and further in view of Yonehara et al. US patent No. 6,790,665.

The rejection is made for reasons or record set forth in this office action and the Action mailed on 02/12/2007 and extended to new claims as necessitated by the applicant's amendment filed on 05/14/2007.

Conclusion

No claims are allowed.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

Art Unit: 1651

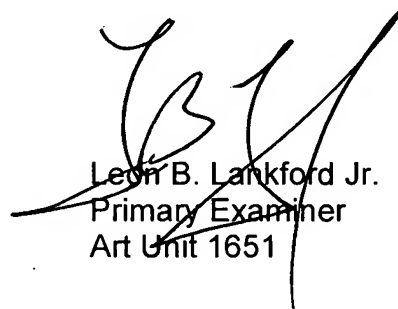

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
